

YAZHI COLLECTION

Premium Women's Boutique • Responsive Shopping + Owner Management

PRODUCT REQUIREMENTS DOCUMENT • VERSION 2.0

Updated master specification for Antigravity implementation

Critical architecture requirement: The website has two roles: Customer/User and Boutique Owner/Admin. If an order placed on a customer phone must appear on the owner device, the application needs shared persistent storage/authentication. HTML/CSS/JavaScript remains the frontend; Firebase or Supabase can provide the shared database/auth layer. If backend credentials are not yet configured, build a clearly separated localhost demo mode with localStorage/mock data.

Image rule: Use dummy placeholder images everywhere an image is required. The owner will replace them later.

1. Project Overview

- **Brand:** Yazhi Collection
- **Owner:** Sharmila M
- **Business:** Women's clothing / boutique
- **Location:** Coimbatore, Tamil Nadu, India
- **Shop hours:** 9:00 AM–9:00 PM
- **Phone/WhatsApp:** 6369685930
- **Frontend:** HTML5, CSS3, JavaScript
- **Build:** Antigravity + VS Code
- **Target:** Responsive web application for desktop, tablet and mobile
- **Users:** Guest, Customer and Owner/Admin

2. Product Vision & Main User Journey

Yazhi Collection should feel like a premium boutique website: elegant, colorful, feminine, Indian-fashion inspired, modern and easy to use. It must not look clumsy or overloaded.

Main journey: Glance Popup → Home → Collections/New Arrivals → Product → Cart → Buy Now → Address/Payment → Order Confirmation → Track Order → History. A guest can explore freely; account creation is required for ordering and consultation.

Owner journey: Owner Login → Dashboard → New Orders → Customer/Order Details → Update Status → Customer sees tracking/history.

3. Reference Image Analysis

- **Saree e-commerce reference:** use its strong hero/category/featured/best-seller/promotion/service/footer hierarchy.
- **Boutique poster reference:** use its warm Indian-fashion character, decorative elegance, gold accents and category presentation.
- **Soft boutique reference:** use its blush/peach atmosphere, clean navigation, category cards and new-arrival presentation.
- **Yazhi identity:** combine these principles without copying exact layouts, logos, text or images.

4. Color, Typography & Visual Theory

- **Deep Plum #3B1F3F:** premium hero/footer/dark sections.
- **Wine #7A3455:** primary CTA and rich fashion accents.
- **Blush #F3DDE3:** feminine highlight sections.
- **Warm Cream #FBF5EC:** main light background; avoid an all-white website.
- **Antique Gold #C9A45C:** borders, icons and luxury accents; use sparingly.
- **Ink #2B2429:** readable body text.
- Use an elegant serif/display font for headings and a clean sans-serif for UI/body text. Script fonts are decorative only.
- Use consistent icons for cart, profile, history, search, phone, WhatsApp, location, delivery, payment and support.
- Use generous whitespace, consistent card sizes and restrained shadows/animations.

5. Site Map

Level	Page / Area	Purpose
1	Glance Popup	3–5 second branded opening
2	Home	Brand, collections, new arrivals, offers, enquiry, contact and social links
2	Collections	All 8 major collections
3	Collection Detail	One collection, five types, images and products
2	New Arrivals	Maximum 7 products
2	Cart	All products added anywhere
2	Buy Now / Checkout	Summary, address, payment and order confirmation
2	Track Order	Status timeline
2	Login / Profile / History	Customer account and previous orders
2	Enquiry	Consultation/contact form + WhatsApp/call
2	Owner Dashboard	Orders, customers, enquiries and status management

6. Glance Popup / Opening Experience

- Show a full-screen or premium modal-style Yazhi Collection glance on opening.
- Display brand name/logo, fashion image and short tagline.
- Automatically transition to Home after approximately 3–5 seconds.
- Include optional Skip/Enter Now control.
- Use a smooth fade/reveal animation; never create a long blocking loader.
- Use dummy placeholders until final images are supplied.

7. Home Page

Area	Required behavior
Running offer bar	Rotate: Birthday 30% OFF; Festival 20% OFF; FREE delivery above ₹4,000; first order FLAT 50% OFF; orders above ₹9,000 FLAT 70% OFF.
Header	Logo, Home, Collections, New Arrivals, Enquiry, Contact + Search/Profile/History/Cart icons.
Hero	Large elegant image, brand description and clear Explore Collections CTA.
Brand description	Short premium explanation of Yazhi Collection and traditional, contemporary and customizable fashion.
Collection preview	Bridal, Festive, Party, Ethnic, Custom Design, Saree Collection, Combos, Contemporary.
New Arrivals preview	Link to dedicated page with maximum 7 products.
Customization	Message inviting users to request another color/style.
Enquiry	Prominent CTA to dedicated enquiry page.
Social media	Elegant social icons; actual URLs can be added later.
Contact	Sharmila M, 6369685930, Coimbatore, shop timing and exact pincode when confirmed.
Footer	Logo, quick links, collections, contact, social links and policies/placeholders.

Suggested running tagline: “🎉 Celebrate in Style with Yazhi — Birthday 30% OFF • Festival 20% OFF • FREE Delivery above ₹4,000 • First Order FLAT 50% OFF • Shop ₹9,000+ & Unlock FLAT 70% OFF 🎉”

8. Offer Rules

- Birthday-related eligible dress/order: 30% OFF.

- Festival-related eligible order: 20% OFF.
- Order above ₹4,000: FREE delivery.
- First eligible order: FLAT 50% OFF.
- Order above ₹9,000: FLAT 70% OFF.
- Make offers configurable. Before real launch, define eligibility, priority and whether discounts can be combined.

9. Collections

Home → Collections must open a separate Collections page.

- Bridal
- Festive
- Party
- Ethnic
- Custom Design
- Saree Collection
- Combos
- Contemporary

Each collection opens a separate detail page with five types, reference images, taglines and product interactions.

10. Complete Collection Type Matrix

Bridal

Type	Tagline
Kanchipuram Silk Sarees	Traditional South Indian bridal wear with rich zari work.
Bridal Lehenga	Popular for engagement, reception and North Indian-style weddings.
Designer Bridal Sarees	Modern sarees with embroidery, sequins, stone and zari work.

Contemporary

Type	Tagline
Co-ord Sets	One Look, Perfectly Paired
Western Dresses	Modern Style, Effortless Grace
Tops & Shirts	Everyday Style, Elevated
Casual Wear	Relaxed Looks, Refined Style
Evening Wear	Own the Night in Style

11. New Arrivals Page

- Clicking New Arrivals opens a dedicated attractive page.
- Maximum 7 products.
- Each product: dummy image, name, rate/price, short description, quantity minus/plus, Add to Cart and Buy Now.
- Rates must be easy to edit later.
- Responsive grid on desktop/tablet and touch-friendly layout on mobile.
- Actions use the same global cart/checkout system.

12. Product & Collection Detail Behavior

- Every collection detail page shows hero/reference image, collection description and five type cards.
- Each type shows image, title and supplied tagline.
- Relevant products appear under/within the type.
- Every product has image, description, rate, quantity controls, Add to Cart and Buy Now.
- Quantity cannot fall below 1.
- Add to Cart updates the global cart from any page.
- Buy Now immediately starts checkout.

- Show: “Love this design in another colour or style? Tell us what you have in mind — Yazhi Collection can explore a customized option especially for you.”
- Provide breadcrumbs/back navigation.

13. Cart

- Products added from Home, New Arrivals or Collections all appear in one global cart.
- Show image, name, quantity, unit price, subtotal and total.
- Allow increase/decrease/remove.
- Show cart count in header.
- Show discount/free-delivery information where applicable.
- Cart Buy Now/Proceed action opens Buy Now/Checkout.
- Persist cart across refreshes; localStorage is acceptable for demo mode.

14. Buy Now / Payment / Checkout

- Buy Now from a product OR Cart opens the Buy Now page.
- Show image, name, details, quantity, price, subtotal, discount, delivery fee and final total.
- Collect name, phone, email and full delivery address: house/building, street/area, city, state, pincode and landmark.
- Provide payment method UI such as UPI/COD for the prototype.
- Validate required fields.
- Do not collect/store card numbers or CVV in frontend code.
- After confirmation, create unique order ID and show order-success page.
- Real payment gateway integration can be added later.

15. Customer Login, Profile & Guest Exploration

- Guests can browse without an account.
- Account is required to place an order or make an account-linked consultation.
- Registration: name, Gmail/email and phone number.
- Profile: name, email, phone and saved addresses.
- Customer can view current orders, tracking and history.
- Owner/Admin login is separate.
- Never expose owner credentials/private keys in frontend source.

16. Order History & Tracking

- Each authenticated customer sees only their own history.
- History shows order ID, date/time, items, quantities, price, discounts, total, payment status and order status.
- Track Order is accessible from confirmation, History and Profile.
- Timeline: Order Placed → Confirmed → Processing → Packed → Shipped/Ready → Out for Delivery → Delivered.
- Cancelled is a separate terminal state.
- Show timestamps where available.
- Live courier GPS is outside Version 1.

17. Owner/Admin Website

- Secure Owner/Admin login.
- Responsive dashboard accessible from phone and desktop.
- Summary: total orders, pending orders, completed orders, enquiries and recent activity.
- Orders list: order ID, customer, phone, date/time, total and status.
- Open an order to see complete customer/order/product/address/payment details.
- Owner can update order status for customer tracking.
- Owner can view enquiry/consultation requests and mark them contacted/confirmed/completed.
- Owner can view complete order history.
- Optional later: product/price/offer management.

18. Enquiry & Consultation

- Enquiry is visible from Home and navigation and opens a dedicated page.
- Fields: name, phone, email, enquiry type, message, preferred contact method and optional consultation time.
- Types: Product, Customization, Bridal Consultation, Party/Festive, Other.
- WhatsApp button opens a WhatsApp conversation to 6369685930 with a prefilled enquiry message.
- Call button uses 6369685930 and is mobile-friendly.
- Website submission shows an immediate confirmation/auto-response.
- True automated WhatsApp replies require WhatsApp Business/API; a simple website link cannot provide API automation.
- Owner dashboard receives and displays enquiries.

19. Contact Details

- Owner: Sharmila M
- Call: 6369685930
- WhatsApp: 6369685930
- Location: Coimbatore, Tamil Nadu, India
- Timing: 9:00 AM–9:00 PM
- Pincode: confirm the exact boutique pincode before final publishing; only city-level location was provided.

20. Technical Architecture

Layer	Requirement
Frontend	HTML5, CSS3, JavaScript; responsive and reusable UI patterns.
Theme	CSS variables for plum/wine/blush/cream/gold palette.
Cart state	JavaScript + localStorage for demo; shared database after authentication for real cross-device behavior.
Authentication	Customer login/register and separate Owner/Admin authentication.
Database	Users, products, orders, order items, addresses, enquiries, status history and offers.
Backend	Firebase or Supabase recommended for shared authentication/database/realtime.
Owner visibility	New orders must be stored in shared backend so owner device can retrieve them.

Layer	Requirement
Demo mode	Mock/localStorage mode allowed before cloud credentials are configured.

21. Suggested Data Model

Entity	Core fields
Users	id, name, email, phone, role, created_at
Products	id, name, collection, type, description, image, price, active
Orders	id, user_id, customer details, address, subtotal, discount, delivery fee, total, payment method/status, order status, created_at
Order Items	order_id, product_id, product name, quantity, unit price, subtotal
Status History	order_id, status, timestamp, updated_by
Enquiries	id, customer details, type, message, preferred contact, status, created_at
Offers	id, title, rule, active dates, active

22. Responsive / Mobile Requirements

- Must work on phone, tablet, laptop and desktop.
- Mobile header becomes a clean hamburger menu.
- Cards reflow without horizontal overflow.
- Hero images crop responsively while preserving the main subject.
- Quantity buttons and CTAs are touch-friendly.
- Checkout forms stack vertically on small screens.
- Owner dashboard tables become cards or horizontally scrollable sections on mobile.
- Test approximately at 360px, 390px, 768px, 1024px and desktop widths.

23. JavaScript Interactions

- Glance popup timer and skip/enter.
- Mobile menu.
- Smooth navigation/scroll.
- Product quantity +/-.
- Global cart count and cart management.
- Add/remove/update cart.
- Buy Now flow.
- Checkout validation.
- Toast notifications.
- Offer banner rotation.
- Enquiry validation.
- Order confirmation and tracking state.
- Owner order status update UI.

24. Image & Editing Strategy

- Use dummy placeholder images in every required image location.
- Use consistent aspect ratios for product cards.
- Keep images in organized folders.
- Use data-driven product names/prices so rates are easy to edit.
- Final images supplied later should replace placeholders without changing page structure.

25. Recommended Project Structure

yazhi-collection/ ■■■■ index.html ■■■■ home.html ■■■■ collections.html ■■■■ collection-detail.html ■■■■ new-arrivals.html ■■■■ cart.html ■■■■ checkout.html ■■■■ order-success.html ■■■■ track-order.html ■■■■ login.html ■■■■ profile.html ■■■■ history.html ■■■■ enquiry.html ■■■■ contact.html ■■■■ owner-login.html ■■■■ owner-dashboard.html ■■■■ css/ ■■■■ style.css ■■■■ responsive.css ■■■■ owner.css ■■■■ js/ ■■■■ app.js ■■■■ products.js ■■■■ cart.js ■■■■ auth.js ■■■■ checkout.js ■■■■ orders.js ■■■■ owner.js ■■■■ images/ ■■■■ hero/ ■■■■ collections/ ■■■■ products/ ■■■■ placeholders/ ■■■■ README.md

26. Security & Privacy Basics

- Never hard-code admin passwords or private backend keys in frontend files.
- Customer data must be protected by authentication/database rules.
- Customers can access only their own profile/history/orders.
- Owner/Admin can access required order/enquiry data.
- Do not store card number/CVV in the frontend prototype.
- Use HTTPS and proper backend security before public deployment.

27. Functional Acceptance Checklist

1. Glance popup appears for about 3–5 seconds and transitions to Home.
2. Guest can explore without account.
3. Home includes logo, description, collections, new arrivals, cart, profile, history, enquiry, contact and social access.
4. Home → Collections opens a separate Collections page.
5. All 8 major collections are present.
6. Each collection has 5 types with images and supplied taglines.
7. New Arrivals contains a maximum of 7 items.
8. Every product has image, price, quantity controls, Add to Cart and Buy Now.
9. All Add to Cart actions feed the same Cart.
10. Buy Now from product or Cart reaches Checkout.
11. Checkout collects address and basic customer/payment information.
12. Order gets a unique ID and can be tracked.
13. Customer sees their history.
14. Owner sees the order and complete relevant details.
15. Owner can update order status.
16. Enquiry supports WhatsApp/call pathways and reaches owner.
17. Website works on phone, tablet and desktop.

18. No dead buttons, broken images or horizontal overflow in final demo.

28. Version 1 Scope & Future Enhancements

Version 1: polished responsive frontend, guest browsing, customer account, 8 collections/40 types, 7 new arrivals, cart, checkout/address, basic payment selection, order creation, history, tracking, enquiry, WhatsApp/call actions and owner dashboard.

Later: real payment gateway, WhatsApp Business API automation, live courier tracking, inventory, advanced admin CMS, reviews, wishlist, search/filter, size/color variants, invoices and delivery-partner integration.

29. Final Antigravity Build Instruction

Build the website from this PRD as the master specification. Do not omit any page, role, collection, interaction or requirement. Use dummy images and editable sample prices.

The visual result must be elegant, colorful and premium—not a plain white template. Use the Yazhi palette, strong spacing, refined typography, varied section backgrounds, tasteful icons and subtle animation.

The most important functional requirement is shared customer/owner visibility: an order placed by a customer must become available in the authenticated Owner Dashboard. Use a shared backend/database for this; provide a clearly separated demo mode if credentials are unavailable.

Navigation must be intuitive: Home → Collections opens the dedicated Collections page; each collection opens its own detail page; New Arrivals has its own page; Add to Cart is global; Buy Now always leads to checkout; orders have history and tracking; owner can update status.
